Ed is out, but available by phone. I will need to see if he is reachable at any of those times. Will look into it tomorrow morning.

Paul,

Do you by any chance have any time in the next two days that we can get together to talk about this? Even if it's just 30 minutes...Looks like we can do any time between 10 am and noon or 1-2 pm tomorrow or 9:30-10 am Thursday. Can you please let me know if any of these times work on your end?

Thanks,

Liz

Just to clarify, my Program Manager is Ed Stone, whom we would like on the call. Also, looking at the Coal Mine permit, that one was an error on the permit writer at the time. That wasn't consistent with our permitting approach.

If you let me know options that work for those you want on the call, I can help arrange a group number we can all use to call into.

Michelle,

This isn't our read of the situation. Maryland issues new registrations under permits that are administratively extended, under the terms and conditions of the specific General Permit. Our only exception is our Coal Mine General permit, which would require an individual permit.

We would like to set up a call to discuss. I would like to make sure that my Program Manager can attend as well.

Good Morning Paul,

I wanted to check in with you on MDE's expired GP. Since the MD CGP expiring on 12/31/2019 and MDE's inability to issue registration to new construction projects under the expired GP, do you have examples of any individual permits that have been written for new projects?

Feel free to give me a call if you would like to discuss. I have a discussion with one of our state partners tomorrow and would love your response as soon as you can.

Sincerely,

Michelle
